

## Labor Scheduling

Reduce labor costs, increase efficiency & foster collaboration

### 1. Control

Forecast labor successfully and easily. Auto-scheduling functionality. Set preferences with employees such as overtime exceptions and total hours.

### 2. Capture

Report on all labor metrics. Know more on who worked, when and expenses.

### 3. Communicate

Staff never misses a shift. Create templates. Enforce shifts. Send shifts out through text message or email. Digital Log Book functionality.

### Did you know?

An average restaurant manager spends up to 4 hours a week on employee scheduling.

What could 4 hours produce? How about increased customer service and more profits in the front of the house. Less waste with greater efficiency in the back of the house.

Looking for a powerful, easy to use labor scheduling solution?

With restaurateurs having less time to accomplish more, our Employee Scheduling and Workforce Management Suite is the key ingredient to consistently get the job done on time and on budget.

Our labor scheduling tools provide the simplicity of a spreadsheet, the look of Coverage Bar Schedules, the speed of drag and drop, the power of forecast data and the intelligence of real-time business rule conflicts and overtime alerts in a single display window.

Your employees can view their schedules and manage availability requests from either the internet, email or mobile text messages.

The screenshot shows the 'WhenToManage' software interface on a Samsung tablet. The interface displays a weekly labor schedule grid. The columns represent days of the week (Mon 9/19, Tue 9/20, Wed 9/21, Thu 9/22, Fri 9/23, Sat 9/24, Sun 9/25) and the rows represent individual employees. The grid shows assigned shifts with color-coded bars and times. For example, 'Dunbar, Joe' is assigned a shift on Monday (8a-3:15p) and another on Friday (8:45p-11:30p [A]). The 'Totals' column on the right shows the total hours and cost for each employee. The interface also includes navigation tabs like 'LABOR', 'INVENTORY', 'POS', 'REPORTS', 'SETTINGS', 'VIDEO', and 'HELP'. A user profile for 'Ryan McFlorie' is visible in the top right corner.

### 5 Reasons to choose a solution:

- No set up fee
- Low monthly cost
- Manage a controllable cost
- Forecast labor for greater efficiency
- Web-based to involve and empower employees
